Multiple tariff application for November-March period: 07.00-18.00 daytime; 18.00-22.00 peak; 22.00-07.00 nighttime.
Multiple Tariff application for April-October period: 06.00-17.00 daytime, 17.00-22.00 peak; 22.00-06.00 nighttime.
Capacity Charge: Monthly fixed-fee calculated per kW based on the "contract power" specified in connection contract and charged to double-term consumers connected to distribution system.
Over-Capacity Charge: monthly fee calculated per kW for amount of power exceeding the "contracted power" specified in the connection contract and charged to double-term consumers connected to distribution system.
Double-Term tariff: Tariff class charged for "distribution fee over the amount of active energy flow (kWh) received from the distribution system or given to the distribution system", plus capacity-charge calculated per kW specified in the connection contract, plus over-capacity charge for the power (in kW) exceeding the "contract power."
Single-term Tariff: The tariff class charged for distribution fee only through the amount of active energy flow (kWh) received from the distribution system or given to the distribution system.
*The active energy price is not reflected in the table, as the price is determined bilaterally between the consumer and the supplier.

Electricity Bill Calculation:
[(Consumption (kWh) x Active Energy Price* (TRYcent/kWh) x 1.02**) + (Consumption (kWh) x Distribution Tariff (TRYcent/kWh))] x 1.18***
Active Energy Price*: the consumers can either purchase electricity from the commissioned supply companies at the prices indicated in the table or at the prices determined bilaterally with the private electricity suppliers.
**Funds (electricity fund 1%, electricity consumption tax 1%)
***VAT 0.18%
